

# CHARACTERISTICS OF LIFE POSTER

Directions: Using the pages 17-21 in your book Miller and Levine Biology identify, describe and explain the 8 characteristics of life. For each Characteristic YOU MUST create a **drawing**, as an **example** and an **explanation describing** what each are. One has been done for you.

CELLS are the smallest unit of a living thing that is considered fully alive. They are complex and highly organized.

Example: plant and animal cells

*Below: Nerve Cell*
