

Photosynthesis Review: Light Reactions/Calvin Cycle

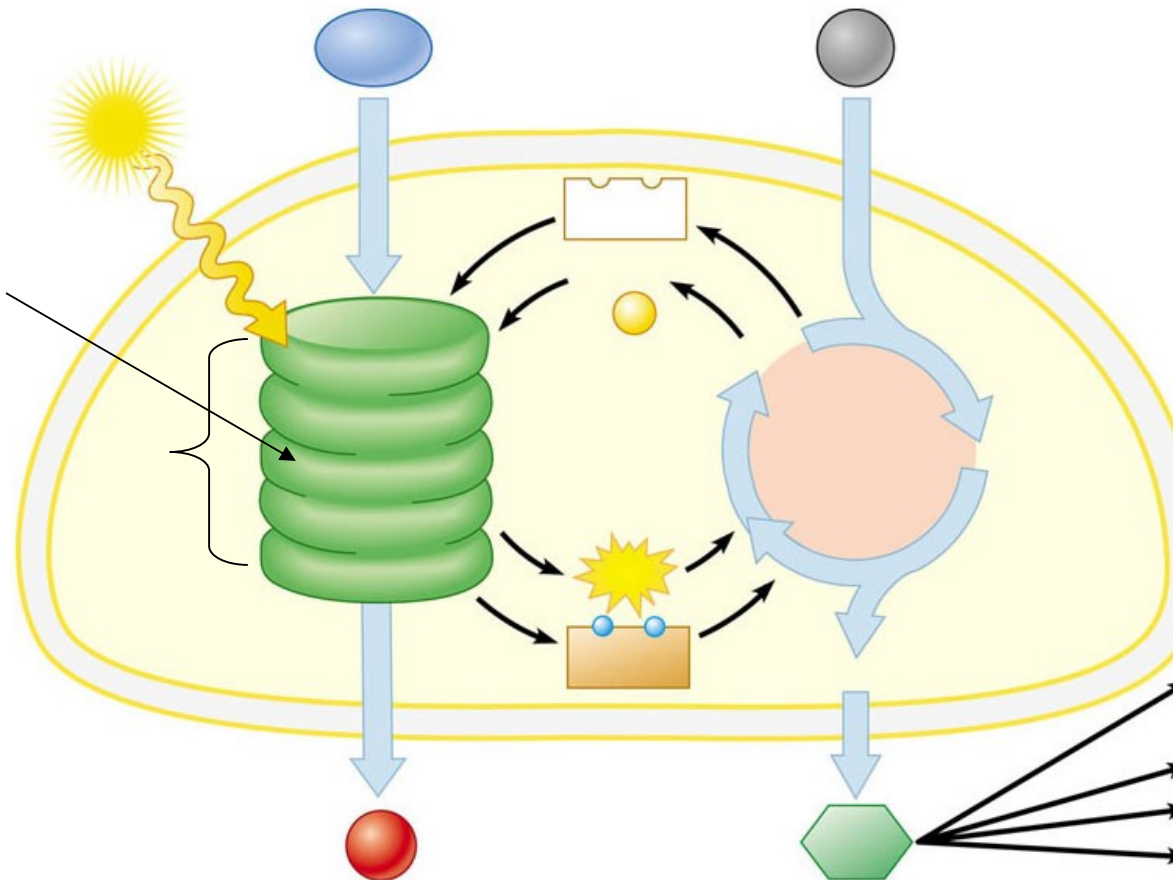

Directions: Label the entire diagram with the vocabulary at the right, some words will be used more than once. Try not look at the Bell work from yesterday. Explain to a friend at the table when you are finished

- Vocabulary**
- Chloroplast
 - Carbon Dioxide
 - Sunlight
 - Thylakoid
 - Granum
 - ADP
 - ATP
 - Calvin Cycle
 - Light Reactions
 - Glucose
 - Sucrose
 - Fructose
 - Other sugars
 - NADPH
 - H₂O
 - Stroma
 - NADP⁺
 - O₂
 - Carbon Fixing
